MIDDLETON SOLAR

EQ08-S & EQ08-SE PYRANOMETER

Secondary Standard Pyranometer for Solar Global Radiation

The Middleton EQ08-S exceeds all international accepted specifications for a high quality pyranometer. The EQ08-S incorporates a unique thermoelectric sensor that has exceptionally low directional error without compromise to signal strength or response time. The EQ08-SE version has an in-built amplifier to give a millivolt output for easy signal measurement.
